

TARIFF RATES

This table summarises applied UK tariffs in key sectors in a No Deal scenario.

MFN stands for Most Favoured Nation tariff. Most Favoured Nation is a WTO principle which means that the same tariffs must be applied to any trading partner, unless an exception applies, for example, that a trading agreement is in place.

*Many agricultural tariffs are compound duties and include a fixed cost by weight e.g. 12.8% on lamb, plus €171.30 per 100 kilos. The equivalent percentage tariff moves around depending on the product. Therefore, it is not possible to provide a representative average in the second below.

**Comparison of UK rate relative to the EU MFN tariff rate where that varies.
